Investprop

AI-POWERED PROPERTY CO-INVESTMENT PLATFORM

Invest in property like institutions — from R10,000.

Investprop gives investors and property partners access to institutional-grade real estate through ring-fenced SPVs, transparent reporting, AI copilots, and guided execution — from due diligence to distribution.

Investors | Property Owners | Funders | Developers | Regulators | Partners

THE PROBLEM

Property is the best-understood wealth engine — and the hardest to access.

High capital barrier

A single entry-level property needs hundreds of thousands in cash, deposits, and transfer costs — locking out most people.

Opacity & trust gaps

Investors rarely see where funds go, how deals are structured, or the true risk and return picture.

No liquidity

Traditional property locks money in for years, with no simple way to exit or trade a stake.

Compliance is heavy

FICA, POPIA and FSCA requirements make small-scale co-investment costly to run legally and safely.

Owners get stuck

Property owners needing capital or an exit have few structured, fair, transparent options.

Guesswork investing

Retail investors lack the tools to model DSCR, IRR, and downside scenarios before committing.

One platform that runs the entire co-investment lifecycle.

Investprop connects capital, property, and compliance — turning whole-property deals into safe, transparent, fractional opportunities anyone can join, track, and exit.

Fractional ownership

Buy a share of a vetted property from R10,000, held cleanly inside a ring-fenced SPV.

AI copilots

AI deal scoring, portfolio briefs, and early-warning distress alerts guide every decision.

Tradable certificates

Digital share certificates you can hold, verify, and trade on the internal marketplace.

Real distributions

Rental income and capital gains flow back proportionally, with downloadable statements.

Compliance built in

FICA verification, POPIA-grade data handling, and FSCA-readiness tooling

Full transparency

Use-of-funds breakdowns, audit logs, and live campaign progress on every

HOW IT WORKS

From listing to distribution in five clear steps.

STEP 01

Source & vet

Deals enter via the acquisition pipeline or property owners, then get financial and AI risk analysis.

STEP 02

Structure & publish

An SPV is created, a funding goal and use-of-funds breakdown are set, and the campaign goes live.

STEP 03

Invest

FICA-verified investors browse opportunities, model scenarios, and contribute from R10,000.

STEP 04

Own & manage

Share certificates are issued; managers run the flip, rental, or development to completion.

STEP 05

Earn & exit

Income and gains are distributed; investors trade shares on the marketplace to exit.

Every step is tracked, logged, and visible to the right stakeholders — nothing happens in a black box.

WHO IT SERVES

Purpose-built experiences for every stakeholder.

Investors

Discover deals, model returns, invest, hold certificates, receive distributions, and trade shares.

Property Owners

List a property for capital or sale through a fair, structured, transparent Owner Portal.

Funders

Back curated pipelines with clear risk scoring, compliance posture, and portfolio reporting.

Development & Project Managers

Run acquisitions, budgets, milestones, contractors, and campaigns end-to-end.

Contractors

Receive work orders, submit progress and variations through a dedicated portal.

Admins & Regulators

Audit trails, POPIA subject-access exports, FSCA readiness, and system oversight.

INVESTMENT PRODUCTS

Three property strategies, one consistent engine.

Property Flips

Buy, renovate, and resell. Investors share the capital gain on completion — modelled with all-in costs, transfer duty, and indicative tax.

Rental Bonds

Income-generating rentals producing recurring distributions — modelled with DSCR, GRM, cap rate, and net yield.

Developments

Affordable resale, affordable rental, and commercial development projects with milestone-based delivery.

- A single financial engine powers every metric — consistent math across flips, rentals, and developments.
- Investor-facing sensitivity tables show downside, base, and upside scenarios before you commit.

AI THAT WORKS FOR YOU

AI copilots before, during, and after you invest.

- **AI deal scoring** — risk and confidence views highlight assumptions and red flags on every opportunity.
- **AI portfolio briefs** — plain-language summaries of how your holdings are performing.
- **AI distress early-warning** — deals trending toward trouble are surfaced on an admin watchlist.
- **AI distressed-property finder** — sources and screens potential acquisition opportunities.

Multi-model AI foundation

Built on leading providers via a unified AI layer — Anthropic, OpenAI, Google, and OpenRouter — so the platform picks the right model for each task.

Deal analysis | Risk alerts | Portfolio insight | Sourcing

Regulation-ready from day one.

Co-investment only works if it is legal, safe, and auditable. Compliance is a first-class feature, not an afterthought.

FICA / KYC

Identity verification workflow with document upload and status tracking.

POPIA

POPIA-aware data handling with subject-access export for data requests.

FSCA readiness

CIS / CISCA compliance checklist and investor appropriateness questionnaire.

SPV structure

Companies Act-aligned SPVs, capped at 50 investors, with legal doc generation.

Immutable audit log

Every privileged action recorded with user, IP, and before/after changes.

Cooling-off

Investor cooling-off period and clear risk disclaimers on every deal.

OWNERSHIP & LIQUIDITY

Real ownership you can prove — and trade.

- **Digital share certificates** issued per contribution and verifiable internally.
- **Share ledger** giving each investor a full transaction history.
- **Share marketplace** to buy and sell fractional stakes for liquidity.
- **Distributions & voting** so shareholders receive income and have a say.
- **Document vault** holding certificates, receipts, and legal documents in one place.

The investor document trail

Contribution	Approved & paid
Certificate	Issued to investor
Ledger entry	Recorded on chain of ownership
Distribution	Income paid proportionally
Exit	Trade on marketplace

TRANSPARENCY

You always know where the money goes.

Use-of-funds breakdown

Every campaign itemises exactly how funds are allocated — validated to match the funding goal to the cent.

Live campaign progress

Real-time funding progress, amount raised, and percentage funded on each opportunity.

Financial reports

SPV income statements, balance sheets, investor statements, and tax reports.

Project tracking

Gantt charts, milestones, budgets, and contractor progress submissions.

Notifications

Investors are alerted on approvals, milestones, and updates in-app and by email.

Financing calculator

Model DSCR, stress tests, and equity IRR before committing capital.

FOR PROPERTY OWNERS

Unlock capital or a fair exit — transparently.

- List your property through the **Owner Portal** for co-investment or sale.
- Submit **sale proposals** reviewed through a structured workflow.
- Reach a pool of **FICA-verified investors** ready to deploy capital.
- Benefit from professional **SPV structuring** and legal documentation.
- Track everything with the same transparency investors get.

Distressed & motivated sellers

An AI-assisted distressed-property pipeline helps owners in difficulty find structured, fair options instead of forced sales — and helps the platform source quality deals for investors.

A modern, type-safe, end-to-end TypeScript stack.

Frontend

React 19, TanStack Router & Start, Tailwind CSS, Zustand state.

API layer

End-to-end type-safe tRPC with Zod validation on every input.

Data

Prisma ORM over PostgreSQL with a rich, indexed domain model.

AI

Vercel AI SDK across Anthropic, OpenAI, Google & OpenRouter.

Storage

MinIO / S3-compatible object storage for documents and images.

Quality

Vitest unit tests, Playwright E2E, strict TypeScript & ESLint.

Deploy

Dockerised, deployable to Render or self-hosted via Docker Compose

Security

JWT auth, refresh-token rotation, bcrypt hashing, RBAC throughout

FOR FUNDERS & PARTNERS

Why back Investprop.

- **Large, underserved market** — millions locked out of property wealth in South Africa alone.
- **Defensible moat** — compliance, AI, and full lifecycle tooling are hard to replicate.
- **Multiple revenue lines** — platform fees, management fees, and marketplace transactions.
- **Regulation-ready** — FSCA-aware design de-risks scaling.
- **Built and working** — a complete, deployed platform, not a slide-only concept.
